

Redefining Enterprise Hyperconnectivity

You're invested in your enterprise business. So are we. Take advantage of a single global network platform that empowers you to digitally transform, not just your network, but the way you do business. Globalgig takes you beyond traditional carrier services, giving you complete freedom of technology, access types, and networks, and connects you everywhere, around the world and in the cloud.

Why Globalgig

We are a global network platform provider and mobile virtual network operator committed to partnering with you to solve your most complex business challenges, regardless of your industry, technology, or budget.

Unified Network Platform

Our Orchestra portal simplifies service management, providing a single place to access all global services.

Optimized Customer Experience

Our fully-managed services are backed by industry-leading expertise, one support team and contract, and billing flexibility.

Expansive Global Reach

Globalgig provides a wide range of both wired and wireless access types, and services across 200 countries through relationships with leading global carriers.

Comprehensive Managed Communications

SD-WAN and SASE

- Delivers a more intelligent network, through improved visibility and control
- Wireless and wireline access options, platform-neutral design approach and choice of carriers
- Comprehensive security capabilities, such as ZTNA, SWG, CASB, and NGFW

Global Networking

- Delivers unified, high-quality, public and private network connectivity, and worldwide reach
- Three tiers of Managed Network Services for maximum flexibility, supported by the simplicity of a single network partner

Mobility and IoT

- Wireless Networking, Wireless Broadband, Private LTE/5G, and IoT connectivity
- Global connectivity via access to 600+ carriers and a comprehensive portfolio of SIM options
- Commercial flexibility with plans tailored to meet diverse operational and pricing models

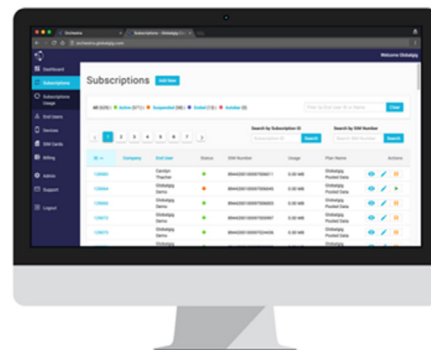

Voice

- Service options that include SIP Trunking, Hosted PBX, and POTS Replacement
- Enables infrastructure modernization and feature expansion, and controls costs
- Supported by industry-leading expertise and is available globally, for easy scalability

Orchestra – One Platform for All Your Services

Orchestra empowers our customers with the necessary tools and intelligence to effortlessly and efficiently manage their global infrastructure. Our advanced network platform offers cloud-based access to a comprehensive range of customer services and equipment inventories, including billing, monitoring, activation, and reporting. Additionally, it provides advanced reporting and management features for wireless services. Orchestra Insight, our network monitoring platform, provides customers the ability to manage network health, availability, and risk across physical, virtual, and software-defined infrastructure anytime and anywhere.

Orchestra can be accessed through a comprehensive range of application programming interfaces (APIs) for optimized performance. Globalgig also uses APIs to connect with suppliers globally, allowing for rapid provisioning and service repairs.

People Are Our Superpower

At Globalgig, we are committed to being the best. Customer experience is not just another metric for us; it is the driving force behind everything we do. Our unwavering dedication to our customers, combined with our extensive industry expertise, is exemplified by our outstanding service delivery metrics, with 97% on-time performance in 2022.

A Solid Foundation That Keeps Getting Stronger

Globalgig is a privately-held, expanding and profitable enterprise. We continue to build on our financial success and have been recognized as a fastest-growing private company on the Inc. 5000 list for the past three years in a row.

Globalgig is committed to delivering high-quality networking services worldwide, and supports this initiative with our global relationships and business operations in the United States, the United Kingdom, France, the Netherlands, and Australia.
