

# Troubleshooting Guide: Change your ZTE MF65 Password

## Step 1:

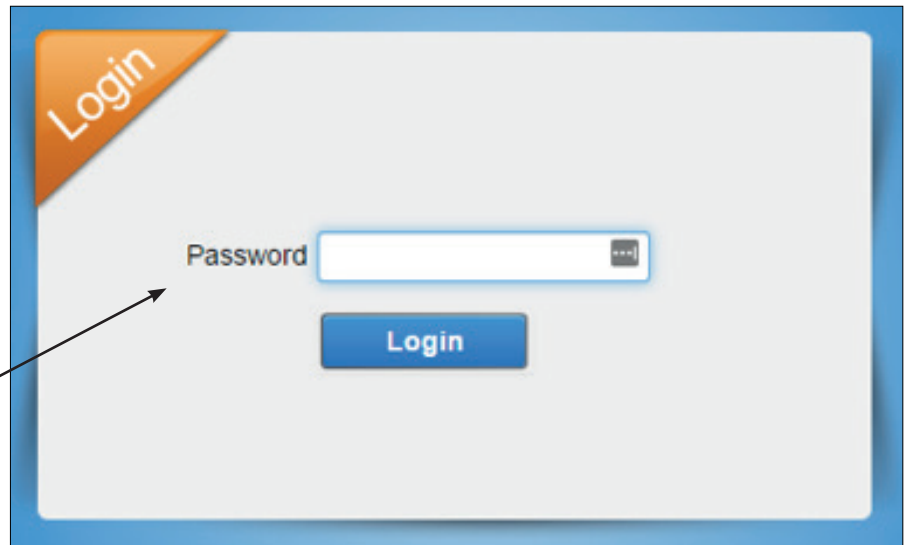

Connect your device to your WiFi hotspot in the usual way

## Step 2:

Once connected to the network. Open your browser and type in **192.168.0.1**. This will take you to the device interface where you can change settings relating to your device.

## Step 3:

Log in to the admin panel. The username and password are **admin** by default

## Step 4:

Click on **Settings** in the top menu then Click **WiFi Settings** in the menu on the right hand side

## Step 5:

Change the **Pass Phrase** to a password of your choice. This will mean, in the future when connecting to your device's WiFi network, instead of using the default password written under the battery cover, you will need to use the personal password you have created. Press **Apply** to save your changes
